

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

## The University of Chicago Science Series

THE purpose of this important new series is to enable the investigator to present the results of his special researches, not only to a wider public but to his scientific colleagues, in a more attractive and accessible form than that of scattered contributions in technical journals.

### The First Published Volume of the Series

**The Evolution of Sex in Plants.** By JOHN MERLE COULTER, Head of the Department of Botany. viii+140 pages, small 12mo, cloth; \$1.00, postage extra (weight 14 oz.).

### Volumes in Preparation for Early Publication

**The Origin of the Earth.** By THOMAS C. CHAMBERLIN, Head of the Department of Geology.

**The Isolation and Measurement of the Electron.** By ROBERT ANDREWS MILLIKAN, Professor of Physics.

**Finite Collineation Groups.** By HANS F. BLICKFELDT, Professor of Mathematics in Leland Stanford Junior University.

**The Problem of Individuality in Organisms.** By CHARLES MANNING CHILD, Associate Professor of Zoölogy.

**Chemical Signs of Life.** By SHIRO TASHIRO, Instructor in Physiological Chemistry.

# Esterbrook

Oval Point No. 788

## Completeness!

Esterbrook Pens offer as many shapes and points as all other American makes put together. This No. 788 Oval Point is one of the twelve most popular ones. Note the smooth, oval (or ball) shaped surface at the point of contact. No sharp edges to scratch or pick even the roughest paper. Heavy steel adds durability.

Send 10 cents for useful metal box containing this and eleven other pens including the famous 048 Falcon.
